- Clinical challenges

# National HIV Curriculum

- Screening and Diagnosis
- Basic HIV Primary Care
- Antiretroviral Therapy
- Co-occurring Conditions
- Prevention of HIV
- Special Populations

The screenshot displays the National HIV Curriculum website. At the top, there are navigation tabs for 'Antiretroviral Medications', 'Course Modules', 'Question Bank', 'Clinical Challenges', 'Tools & Calculators', 'Resource Library', and 'Master Bibliography'. Below the navigation is a 'Take the Online Course' section with the following text:

**Free to Use**  
Start learning and review materials anytime without having to register.

**Sign In and Save Your Progress**  
Create an account, sign in, and track your progress as you work.

**Free Continuing Education**  
Sign in and obtain free CME or CNE as you work through the modules.

On the right side of the page, there are two login sections: 'New Users' with a 'Create a free account to get started.' link and a 'Required for CE' checkbox, and 'Returning Users' with a text input field containing 'spach@uw.edu' and a 'Sign in' button. A 'Forgot password?' link is also present.

Below the login sections is an 'Available Modules' section with a grid of six modules:

- 1 Screening and Diagnosis**  
This module is for any health care provider who would like to establish their competence in testing for HIV infection, and linking persons diagnosed with HIV to medical care.
- 2 Basic HIV Primary Care**  
The Basic HIV Primary Care module is intended for any clinician who may interact with HIV-infected persons in a clinical setting, with an emphasis on the primary care management issues related HIV.
- 3 Antiretroviral Therapy**  
The Antiretroviral Therapy module is geared toward clinicians who provide antiretroviral therapy to persons with HIV infection, with an emphasis on initiating antiretroviral therapy and management of adverse effects.
- 4 Co-Occurring Conditions**  
The Management of Co-Occurring Conditions module addresses the prevention and management of infectious and non-infectious complications in HIV-infected persons.
- 5 Prevention of HIV**  
The Prevention of HIV module emphasizes new prevention strategies both for persons with HIV infection and for persons not infected with HIV. This module also addresses occupational and nonoccupational HIV postexposure prophylaxis.
- 6 Special Populations**  
The Special Populations module is intended for any medical professional involved in the care of special populations of HIV-infected persons.
