

The Ryan White HIV/AIDS Program's AETC Program is working to achieve the goals for

ENDING THE HIV EPIDEMIC (EHE): in the United States

The goal: reduce new HIV infections in the U.S. by 75% by 2025 and by 90% by 2030

The AETC Program, funded by the Health Resources and Services Administration's HIV/AIDS Bureau, is one of several programs awarded to tailor and implement strategies to build clinician capacity to address the plan's 4 key pillars:

- 1** Diagnose all people with HIV as early as possible.
- 2** Treat people with HIV rapidly and effectively to achieve sustained viral suppression.
- 3** Prevent new HIV infections by using proven interventions, including pre- and post-exposure prophylaxis and syringe services programs.
- 4** Respond quickly to potential HIV outbreaks to get needed prevention and treatment services to people who need them.

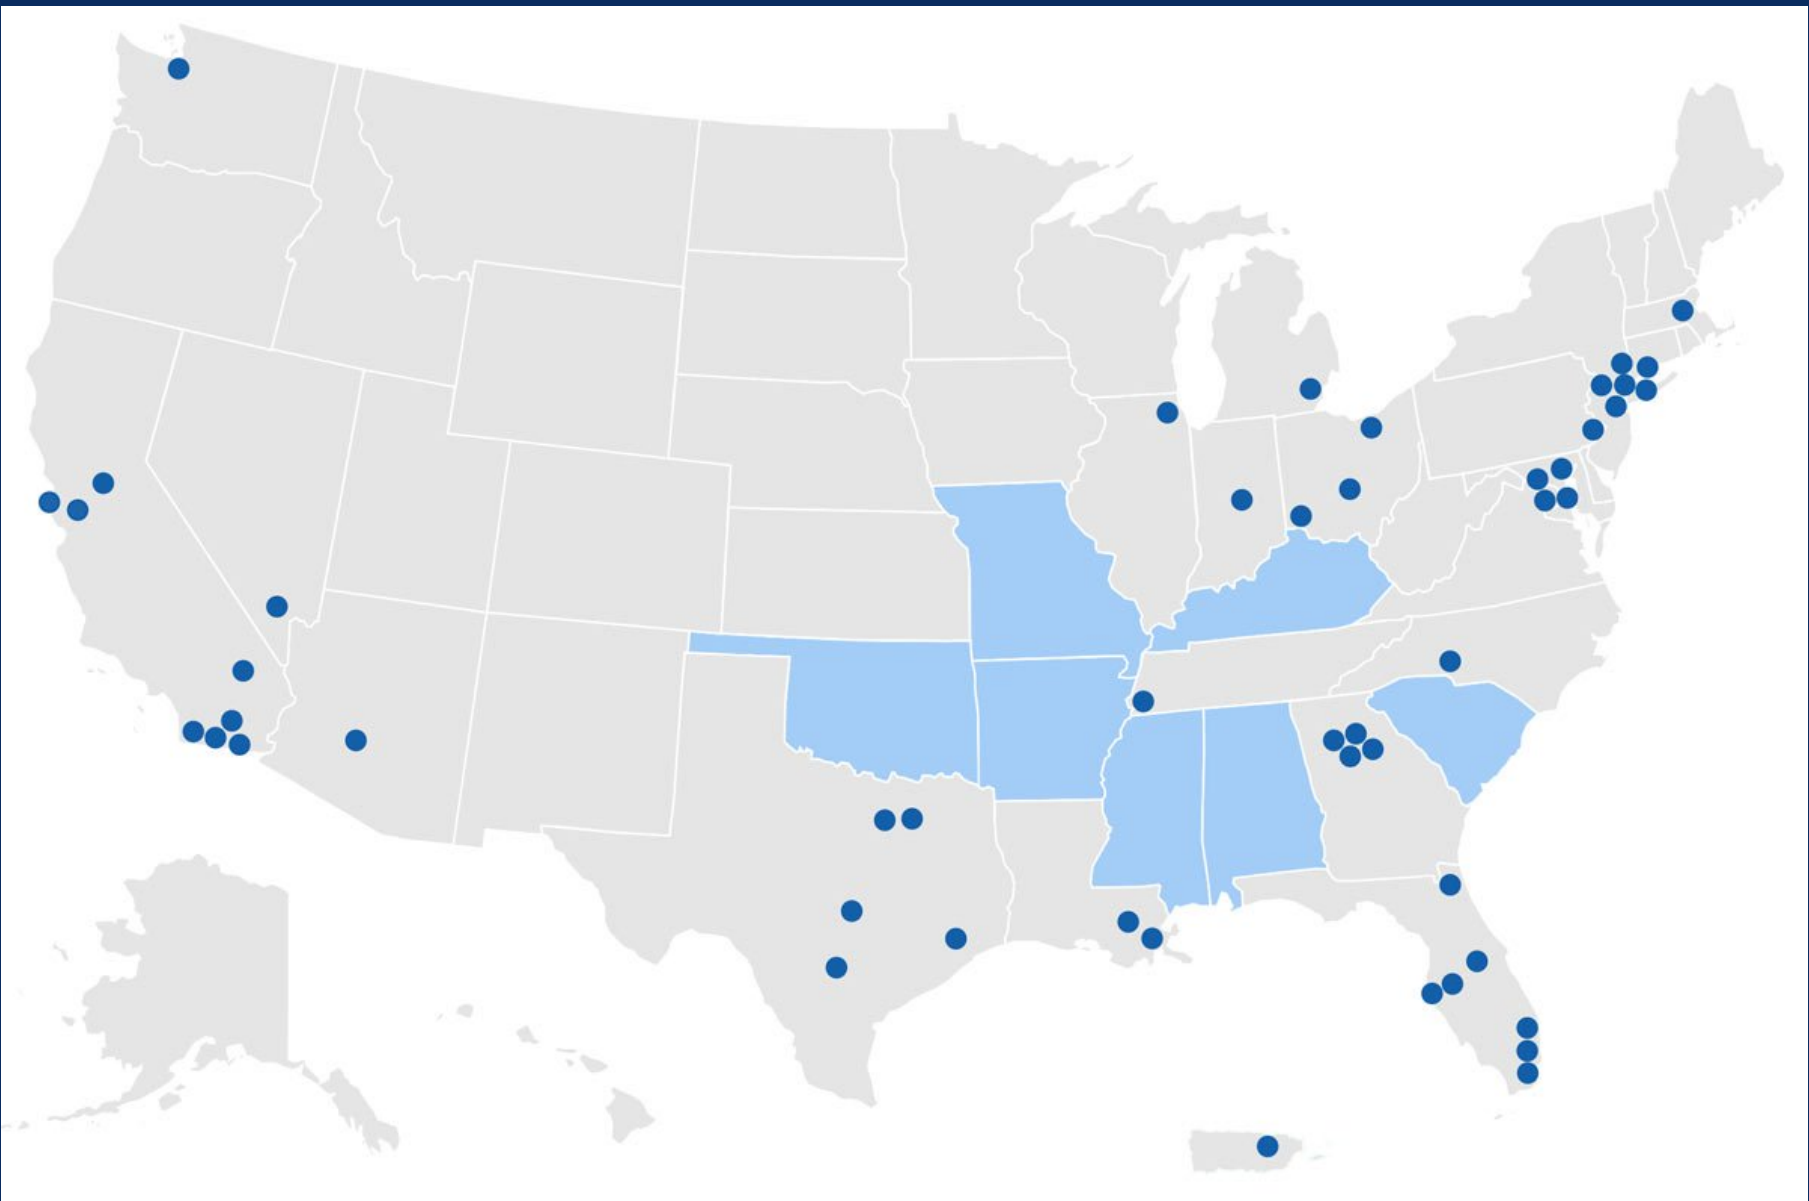

The EHE initiative is focusing on approximately 57 jurisdictions (cities, states, and counties) where new HIV infections are most concentrated.

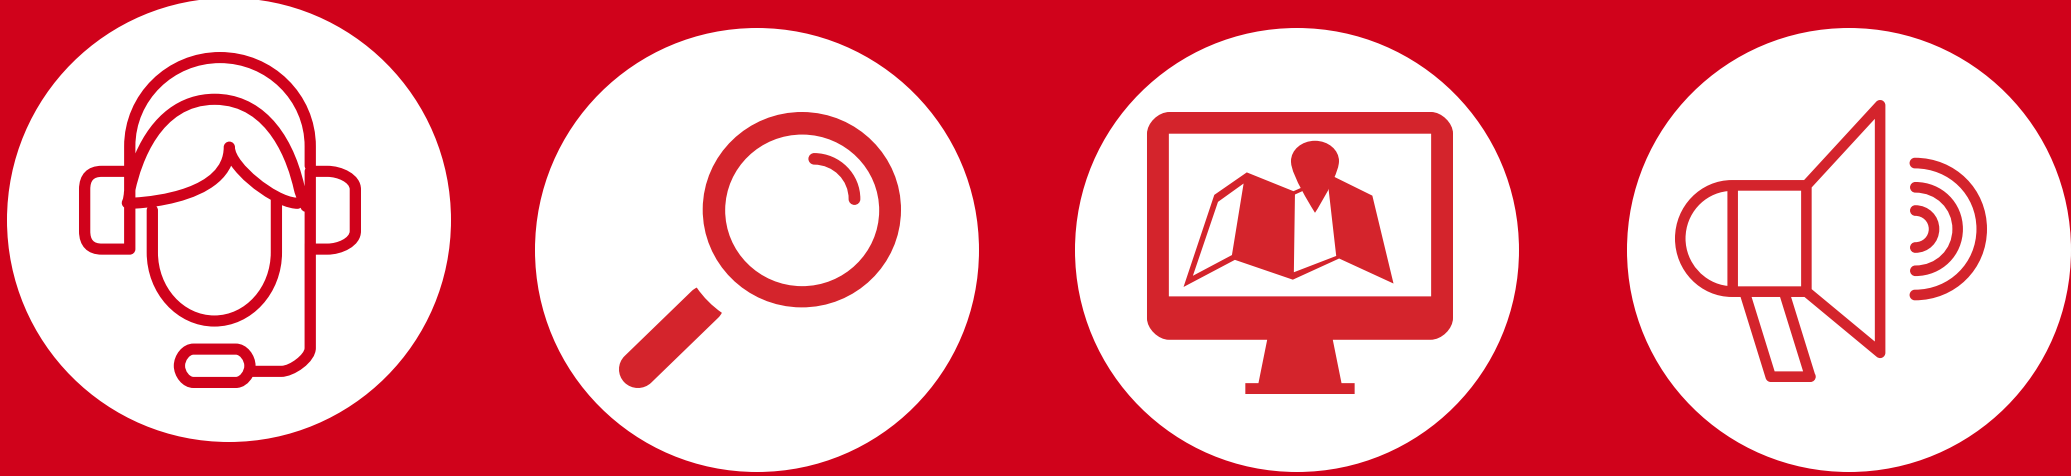

Each of the 8 AETC regions has at least one such jurisdiction.

Regional AETCs

- MidAtlantic AETC
- Midwest AETC
- Mountain West AETC
- New England AETC
- Northeast/Caribbean AETC
- Pacific AETC
- South Central AETC
- Southeast AETC

Regional AETCs will support EHE activities in their jurisdictions with targeted training and technical assistance for healthcare settings responding to at least 1 of the plan's 4 pillars

National AETCs will provide clinician-to-clinician consultation and identify, develop, and promote resources to help support regional AETC EHE activities

Examples of AETC Program resources and training tools to support regional AETC EHE activities:

HIV Care Tools App

Visit aidsetc.org/directory/aetcs-and-ending-hiv-epidemic-initiative for information about these resources and other AETC EHE activities.
